

STUDENT ENERGY

STARTING A CHAPTER

Ready to get started? We require applicants follow a five-step process to assess whether your needs, expectations, and professional development goals align well with our Student Energy Chapters network.

2020 STUDENT ENERGY CHAPTERS

PHASE 1
Expression of Interest

PHASE 2
Initial Assignment

PHASE 3
Initial Interview

PHASE 4
Onboarding

PHASE 5
Welcome to Chapters!

PHASE 1

- Fill out a simple form to let us know you are interested in starting up a Chapter on your campus.
- At this step, your application will be considered qualified or unqualified.
- If you meet the basic requirements, and we have space in the program, you'll be sent the initial assignment.
- This assignment will include a visioning exercise to help you think through the vision of your future Chapter.

PHASE 2

- Complete the initial assignment to help describe the vision for your Chapter within 2 weeks

PHASE 3

- On the call, you will receive more information on what being a Chapter means. We'll talk about your goals and ideas about starting a Chapter and let you know what expectations we have for you.
- Your interview and expression of interest will be assessed and evaluated. Based on this, you will be either accepted or rejected from the program. If rejected, this means that we are not ready to take you on as a part of the Chapters Program just now, but in the future we may be in a position to do so. You are encouraged to reapply and become involved in other Student Energy Programs.

PHASE 4

- Sign a Memorandum of Understanding (MOU) with Student Energy.
- Propose a team of 3-5 founding members who you will work with to run your Chapter.
- Look into officially registering your Chapter at your school.
- Provide status update within 2 weeks to the Director of Global Youth Engagement.
- You will be given a time and date for your onboarding call.

PHASE 5

WELCOME! You are now an official Student Energy Chapter. You will be accepted into the Student Energy Chapter community and given access to valuable logos, documents, and information that will help build your Chapter.

We're starting a fantastic partnership between you, your school, and Student Energy. Together we'll shape our energy future and empower the next generation of energy leaders.

ABOUT CHAPTERS

Student Energy Chapters are an opportunity for students to establish a branch of the organization on their university campus. Chapters allow students to leverage our global brand and organizational knowledge to **take action on energy in their communities** by facilitating energy debates, executing energy projects, or hosting regional summits. Plus, the Global Chapter Network is an incredible opportunity for students to connect to and work with their like-minded peers from around the world.

This program is an incredible opportunity for students to **make their voices heard, formulate opinions, and implement solutions**. Student Energy Chapters are a vehicle to help these youth transform into change agents who will make the visions of our sustainable energy future a reality.
