

STUDENT ENERGY FACT SHEET

ABOUT

Student Energy is a registered global youth-led organization that empowers the next generation of leaders who are accelerating the transition to a sustainable, equitable energy future.

VISION

Student Energy envisions an energy system that serves the world's needs in a way that is economically, socially, and environmentally equitable. Starting with this end goal, our Theory of Change utilizes backwards mapping to define how our work creates the conditions necessary for this goal to be achieved.

IMPACT

WE ENGAGE A NETWORK OF 50,000 YOUNG PEOPLE IN 120+ COUNTRIES

10,000,000+ VIEWS ON OUR ENERGY SYSTEM MAP AND VIDEOS

HOSTED 6 STUDENT ENERGY SUMMITS, THE LARGEST YOUTH-LED ENERGY CONFERENCE IN THE WORLD

45 UNIVERSITY-BASED CHAPTERS IN 26 COUNTRIES THAT HAVE ENGAGED 14,000+ YOUTH

WE'VE WORKED WITH 100+ FUNDING AND STRATEGIC PARTNER ORGANIZATIONS

HISTORY

Student Energy started with a spark. Three driven students, passionate about energy, found that young people like themselves had no space to engage directly with the decision-makers and influential leaders who were determining their energy future. It took just one ambitious idea: an international conference in 2009 where young people set the agenda, led the discussions, and asked the questions, bringing together hundreds of youth passionate about energy and some of the world's most influential energy leaders. Student Energy is now one of the leading youth non-profits in the global energy sphere.

PROGRAMS

- 1. Chapters Program:** Chapters are student-led, post-secondary clubs that take action on energy in their local communities through energy education and awareness-raising events and tangible energy projects, supported by skill-building and mentorship from Student Energy and collaboration with a global network of Chapters.
- 2. Energy System Map:** Our System Map takes users on an interactive through the energy system. It includes an interactive map view, a searchable energy topics index view, and accompanying videos.
- 3. International Student Energy Summit (SES):** This conference is Student Energy's pinnacle event, occurring biennially in a different city around the world to unite hundreds of students from countries all over the globe. SES is a multidisciplinary forum where students can engage with their peers, as well as leaders in the energy industry to learn, collaborate, and take action on energy.
- 4. Space for Youth:** We create meaningful opportunities for young people to engage with actors in the energy system – governments, companies and other institutions – to elevate the role of youth in decision-making and planning.
