

STUDENT ENERGY PROGRAM AT COP27

SHARM EL-SHEIKH

COP27
SHARM EL-SHEIKH
EGYPT 2022

STUDENT ENERGY'S CORE MESSAGES

1. Increase investment in capacity building and skills training, with a focus on people who have historically been excluded and underrepresented in the energy sector, including young people, Indigenous people, women, people from the Global South, and workers who need support transitioning from the fossil fuel sector to a job that supports a just transition.
2. Implement clear pathways and opportunities for diverse young people to participate in decision-making processes related to climate policy, at sub-national, national, and international levels, with clear evidence of youth inputs contributing to policy decisions.
3. Increase financial investment and support for youth-led climate solutions, including youth-led clean energy entrepreneurship, and grassroots and community organizing efforts.
4. Accelerate the deployment of existing climate solutions that can deliver multiple co-benefits, such as technologies and policies improving energy efficiency and conservation, demand-side management, and protecting natural carbon sinks.
5. End development of new oil and gas fields, and new coal-fired power stations. Develop plans to phase out coal-fired power generation by 2030 in OECD countries and the European Union, and by 2040 in all countries.

STUDENT ENERGY DELEGATION IN SHARM EL SHEIKH

Student Energy is working with key partners, including Sustainable Energy for All, the Government of Canada, and NYU Abu Dhabi, to ensure that youth have access to attend COP 27 Sharm El Sheikh in person. SEforALL is supporting a delegation of **ten young women from developing economies to attend and participate in dedicated programming at the SDG 7 Pavilion** and throughout the blue zone.

Student Energy will have a delegation of **16 Student Energy young leaders who will be working with us on side events and bringing core messages to world leaders**, while participating in programming throughout the blue zone. Countries represented will include Canada, India, Jordan, Brazil-Paraguay, Nigeria, Trinidad, Uganda, Spain, UAE, Poland, and the UK.

PROJECT LAUNCHES AT COP27

ENERGY TRANSITION SKILLS REPORT

Student Energy, in partnership with Ørsted, launched the Energy Transition Skills Project in 2022 to identify what is needed to ready young people for energy transition jobs. The report will launch at COP 27 and share survey results and recommendations from 5,000 youth around the world, on how to create more accessible and inclusive entry points for young people to enter and stay in careers that accelerate the global energy transition.

YOUTH IMPACT FRAMEWORK

Student Energy, in partnership with the Global Covenant of Mayors, is developing a set of impact measurement tools and indicators, and a guiding framework, to help youth climate advocates, project leaders, and founders measure and communicate the impact of their initiatives. The goal of this tool is to support development initiatives to incorporate youth-inclusive project design principles, by recognizing the positive impact of youth contributions to SDG 7 and across the Sustainable Development Goals.

GLOBAL YOUTH ENERGY OUTLOOK

FINAL REPORT LAUNCH

Student Energy launched the GYEO in 2020, the first youth-led research project of its kind to collect youth perspectives on energy. Through an online survey and a series of Regional Dialogues, the Global Youth Energy Outlook was able to engage 41,652 young people, aged 18-30, from 181 countries and territories around the world. Championed by current energy leaders, the Global Youth Energy Outlook aims to facilitate intergenerational collaboration on delivering an energy future that meets the needs of all generations and effectively addresses the climate crisis in a globally equitable way. The comprehensive printed report will be launched in full at COP27.

SIDE EVENTS

WEEK 1

When	Session	Blue Zone Location	Thematic Day
Tuesday, Nov 10	Youth & Indigenous Leadership in Canada's Road to Net-zero	Canada Pavilion	Youth & Future Generations Day
Tuesday, Nov 10	Investing in Youth for the Just Energy Transition	SDG 7 Pavilion	Youth & Future Generations Day

SIDE EVENTS

WEEK 2

When	Session	Blue Zone Location	Thematic Day
Tuesday, Nov 15	Launch of the Youth Impact Framework, with the Global Covenant of Mayors	SDG Hub	Energy Day
Tuesday, Nov 15	Unlocking Potential: Working with Young People for the Just Transition	We Mean Business Pavilion	Energy Day
Tuesday, Nov 15	Announcing the International Student Energy Summit 2023	Youth Pavilion	Energy Day
